Gett

If you decided to take a taxi, you should avoid touts operating in front of every airport arrival terminal (it can be rather unsafe and pricey, as in any city of the world). Better book or even prebook a car from the official taxi company. We suggest participants to download the Gett Mobile Application (supported by [iPhone](#), [iPad](#), and [Android](#)) upon their arrival to Moscow.

You can track your driver on the map in real-time mode

The App is available both in Russian and English

Any taxi ride can be paid by the credit card online, instantly and commission-free

It is possible to book a taxi for a certain hour in advance or for now

Offered options and the App Menu

If you want to be met with a banner (with your name marked on it) in the airport you have to drop a comment for your driver

In case you need to be met with a banner in the airport, you have to pay the parking cost additionally, according to the existing fares in the airport

The popular Uber service is also presented in Moscow. You can download the application from [App Store](#), [Google Play](#) and [Microsoft Store](#).

You can track your driver on the map in real-time mode

The App is available both in Russian and English

Any taxi ride can be paid by cash, the credit or debit card online or PayPal, instantly and commission-free

It is possible to shedule a taxi for a certain hour or for now

When requesting uberX or UberBLACK at the airport, you'll be asked to confirm your terminal and door number. Reference the app to note your driver's vehicle model and license plate number. Be on the lookout as he or she approaches.

Request your ride once you've collected your luggage from baggage claim and are ready to step outside. Then use the app to select your pickup location. Your driver's vehicle has room for up to four people and their luggage.

If any trouble with your request arises please contact the Uber Help (the link is in the App).
